

How to clean the swimming pool tiles and grout

Regular maintenance of **tile and grout cleaning Melbourne** is a must job. Swimming pool tile and grout gets dirty easily and affect with mould and algae

Detergent Wash

- Take some detergent and start scrubbing it on the tile from a less dirty area, and wash the tile thoroughly.
- Slowly switch to the more dirty area and clean it thoroughly too.
- Use a pumice stone to scrub the tile, it's safe on pool made from tiles, but do not use it on vinyl or fibreglass floors or you'll damage your tiles.

Apply a commercial cleaning agent

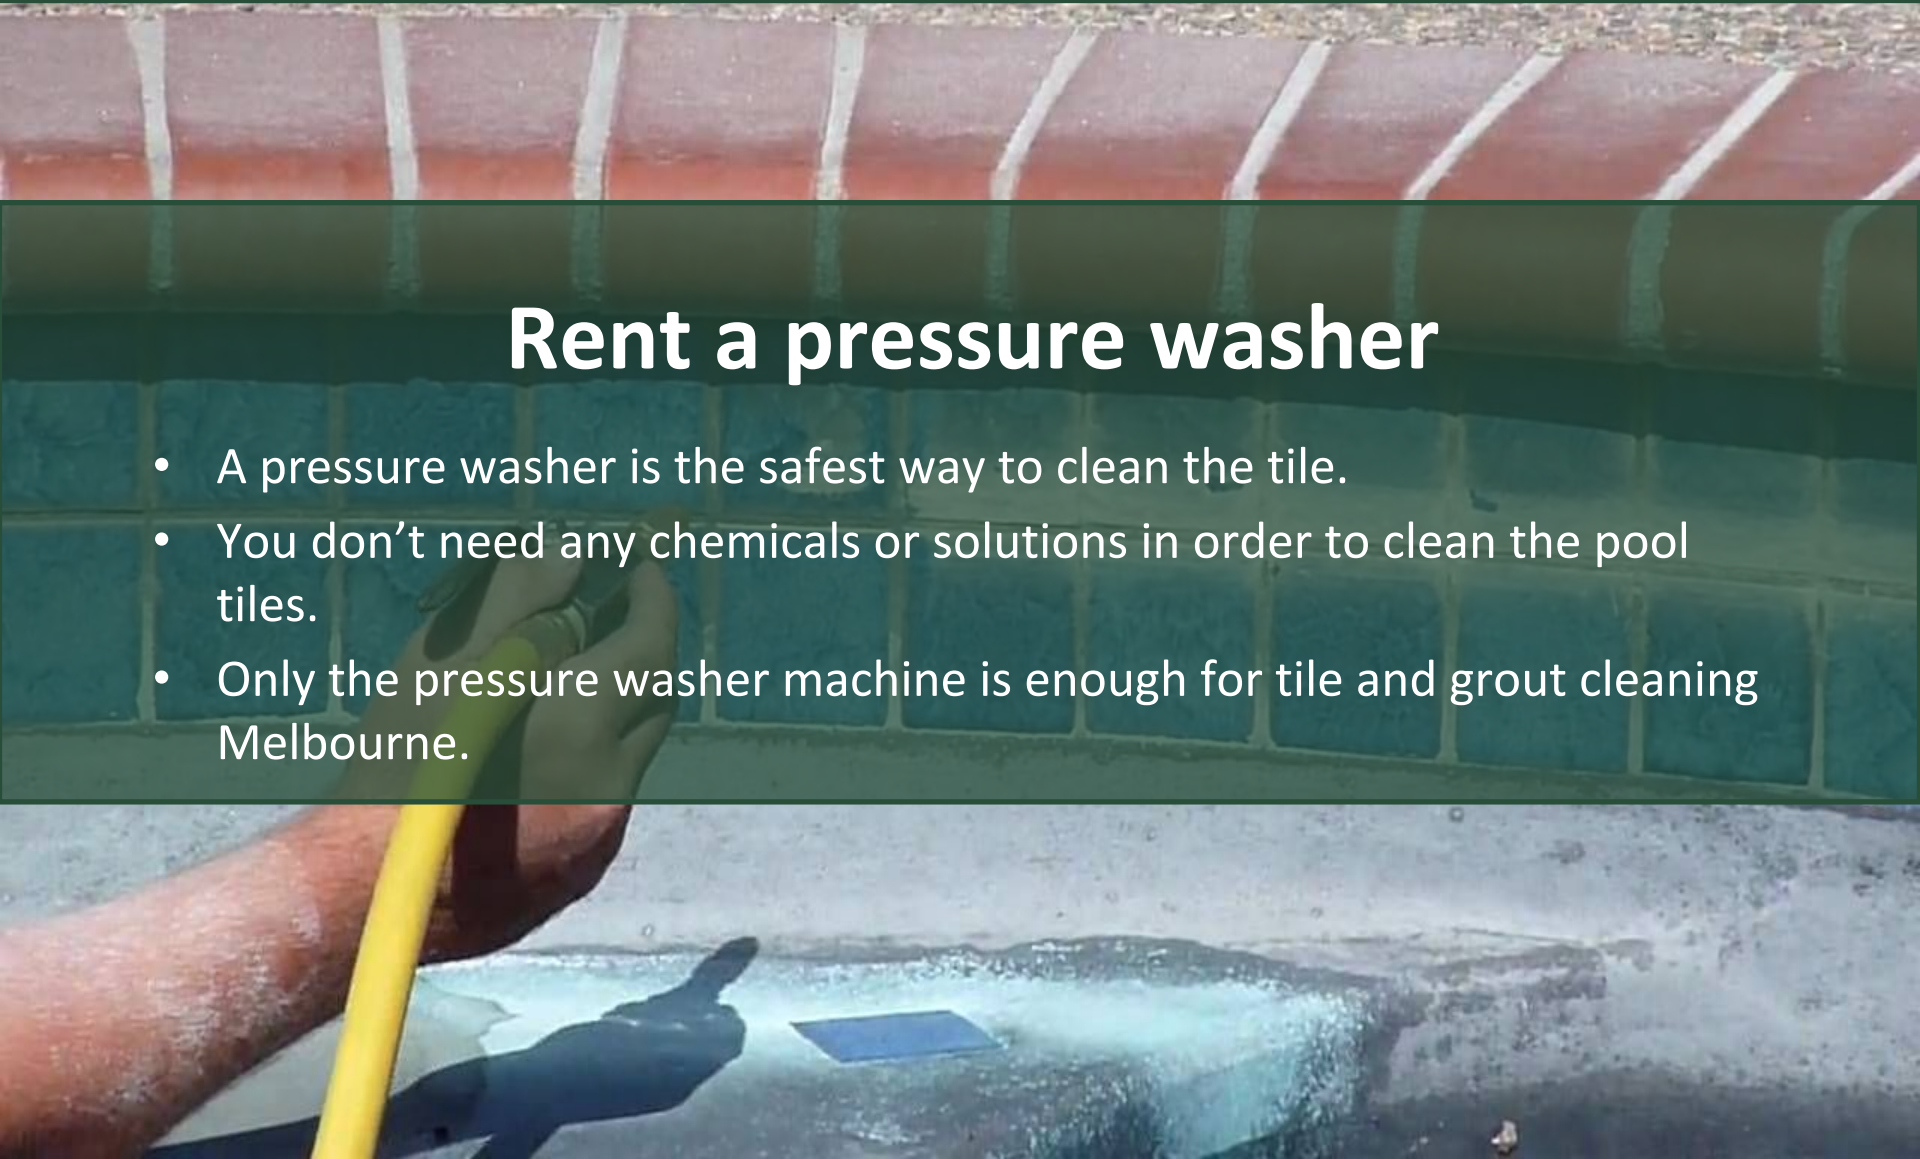

- Commercial cleaning agent removes the calcium layer, which makes the tiles look yellow and ugly.
- Remember, you should check the concentration of cleaner, if the cleaner is too harsh, it may damage the tile.

Rent a pressure washer

- A pressure washer is the safest way to clean the tile.
- You don't need any chemicals or solutions in order to clean the pool tiles.
- Only the pressure washer machine is enough for tile and grout cleaning Melbourne.

Acid washing

- Acid wash is hazardous and dangerous but it'll clean and sanitize your pool 110%.
- But before doing it take proper precautions.
